

## FEATURES

- Transfers data from legacy media to more-reliable modern media
- Data remains supportable after original media manufacturer's end-of-life

## BENEFITS

- Provides long-term viability for legacy data
- Reduces facility storage requirements

# Legacy Media Retrieval Service

## Overview

Fragile, bulky, aging media archives pose potential data loss and waste valuable facility assets. Compro's Legacy Media Retrieval Service (LMRS) addresses this liability by offering a convenient, professional fixed-price service that will transfer data from old, obsolete media to modern media formats.

Compro can retrieve your old SEL, Gould or Encore data and re-write it using modern, reliable media products. If desired, Compro also can perform 9-track to 9-track transfers using new, fresh tapes.

## Description

For a fixed price, Compro accepts any one of the following media:

- One disk pack
- One disk drive
- Three magnetic tapes (9-track, QIC, etc.)
- One 4 mm DAT

and provides the following services:

- Physically inspects the media to determine basic readability.
- Sets up a system with the appropriate peripheral device(s).
- De-compresses (if applicable) and reads data from the supplied media.
- Generates output media in one of the following formats:
  - Hard copy
  - 9-track, 800 BPI magnetic tape
  - 9-track, 1600 BPI magnetic tape
  - 5 1/4" floppy disk
  - 8" floppy disk
  - 1/4" cartridge tape (requires MPX 3.6.0 or later)
  - 8 mm cartridge tape (Exabyte)
  - 3 1/2" floppy disk
  - 9-track, 6250 BPI tape
  - CD ROM
  - 4 mm DAT
  - DVD ROM

**Media Requirements**

This data transfer service is limited to media produced by SEL, Gould or Encore computer systems. Compro cannot accept physically "crashed" disks or heavily-damaged media. The data format is retained with all transfers. Source file data translation is available for an additional fee.

**Note:** You will need to complete a release document certifying legal ownership of the submitted material and data/information contained therein. If, after initial inspection and equipment setup, the media is unreadable, it will be returned to you and a flat \$750 inspection/setup/processing fee will be charged.

**Ordering Information**

Model Number	
CS07-LMRS-x	where <b>x</b> is one of the following output formats: 0 = Hard copy 1 = 9-track, 800 BPI magnetic tape 3 = 9-track, 1600 BPI magnetic tape 5 = 5 1/4" floppy disk 6 = 8" floppy disk 7 = 1/4" cartridge tape (requires MPX 3.6.0 or later) 8 = 8 mm cartridge tape (Exabyte) 9 = 3 1/2" floppy disk B = 9-track, 6250 BPI tape C = CD ROM D = 4 mm DAT V = DVD ROM Y = Other (additional charges may apply)
